Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Applicant's election of the invention of Group I in Paper No. 16 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 28-31 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 16.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wiseman et al in view of Official Notice. Wiseman et al discloses the invention substantially as claimed. Wiseman et al discloses a method and control for a refrigerating system having at least one refrigeration compartment and a quick chill/thaw pan in which the user inputs preferences by manipulation of the control interface (see col. 3, lines 23-34) and having a main board 206, dispenser board 326 and temperature adjustment board 328 coupled via a serial communications bus 330 (see col. 4, lines 29-42). Official Notice is taken that the execution of a plurality of control algorithms in a microprocessor based upon the determined state of a refrigeration system in order to

Art Unit: 3744

carry out the required operations such as defrost, quick chill and dispensing are conventional in the refrigeration art. Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified the system of Wiseman such that it included the execution of a plurality of control algorithms in a microprocessor based upon the determined state of a refrigeration system in order to carry out the required operations such as defrost, quick chill and dispensing.
